Unquote.

**WE HEREBY REPORT** that Aluminium Phosphide **pellets** fumigant formulation was applied to the grain on the above referenced vessel on **November 2, 2021** after loading on board the carrying vessel. We further report that the fumigant formulation application type **Short Probe** at a dosage of 3 grams of aluminium phosphide (1 gram of phosphine gas) per meter cubed was made in accordance with Transport Canada Marine Safety, and Federal Grain Inspection Service regulations and instructions and applicable local laws and regulations. Application started on November 2, 2021 @ 16:45 Hours and finished on November 2, 2021 @ 17:30 Hours  
Cargo Temperature: 18 °C

HOLD NUMBER	HOLD CUBIC METERS	QUANTITY OF FUMIGANT USED IN KG'S
1	5367.63	16.5
2	9438.82	28.5

It is understood that the destination of the above named vessel is **MEXICO** with an estimated time of arrival of **13** days. The holds fumigated must remain closed for a minimum period of **10** days. We certify that immediately following application of the fumigant formulation all openings to the fumigated space were closed and sealed and placarded with appropriate warning sign. The Captain or Officer in charge accepts responsibility for the ongoing fumigation, safety and aeration as contained in the pre-fumigation statement and safety instructions provided.

*For some destinations there might be some specific local requirements regarding the gas free status of the vessel at arrival in the port of destination. These local rules may result in undue delays in obtaining satisfactory gas free results in accordance with the local requirements and which are beyond the control of SGS.*

*This document cancels and supersedes certificate number 2111030C6B previously issued on November 3, 2021.*
