**INSPECTION METHOD AND FINDINGS**

The Final Random Inspection was conducted by us on November 20<sup>th</sup>, 2021 at Kuantan Port , Kuantan, Malaysia. Based solely on our observation at time and place of our intervention, we report as follows:-

**INSPECTION METHODS APPLIED:**

**Visual Inspection**

Due to limitation of accessibility to measure the consignment presented, a total of 17 bundles or equivalent to about 10% of the total number of bundles of the consignment were randomly selected. Each selected bundle was physically measured by us utilizing a measuring tape in as is where is condition against PACKING LIST dated November 17<sup>th</sup>, 2021 provided by shipper during our intervention. Our findings are as follows: -

REPORT NO: F580101/KTN/082-B/10448519/21

#### CONCLUSION

Based solely on our methodology applied and findings established at time and place of our intervention, we are of the opinion that the actual volume of the total consignment as measured and calculated by us against that as declared by the exporter, it was noted that the declared quantity is exceeded the **Malaysian Grading Rules for Sawn Hardwood Timber (2009 Edition)** tolerance as follows: -

(Total of Column [C] minus Total of Column [B]) = **13.2870 M<sup>3</sup> or 4.29%** **Exceeded Tolerance**

In view of the above, the recommended chargeable quantity of the consignment is **322.6703 M<sup>3</sup>**

The issuance of this Report does not exonerate Buyers or Sellers from exercising all their rights and discharging all their liabilities under the contract of sale. Stipulations to the contrary are not binding on us.
